(Use single size or double, Suggest use try the Dollar Store for inexpensive frames)

White and black transfer paper

Palette - Use foil or paper plates or palette papers

Acid Paper Doodle Paintin by Babycakes

What to do in 10 steps :

1. * Use the pattern with doodle centered provided to cut the 3 x 3 inch squares of acid paper square , and transfer papers all the same size .
suggestion: (If you plan to use a matted frame, make the acid square sized at 4 x 4 inches)
 2. Paper clip acid paper , white transfer paper ,and doodle pattern square together.
 3. with a sharp pencil follow the pattern carefully.
 4. Remove paper clip and begin to paint flowers first approximately 3 coats on each flower until covered well.
 5. Then *side load the lilac or burnt umber paint to go around edges lightly, blending as you go. (see side load info at bottom)
 6. Now fill in leaves , approximately 3 coats then side load on rose leaves dark forest green to go down center , blending well.
see now that was simple.....
- let painting dry for 15 minutes,...or so.
7. Remove then spray lightly with sealer. Allow to dry 30 minutes.
 8. Now on rose use black transfer paper and doodle pattern to add swirl lines to center of the rose.
 9. Then do ink work. lightly follow the edges and transfer lines using the indian ink pen.
 10. Frame and enjoy.

All my Babycakes Doodles & Designs can be use to paint on acid paper, among other things . This is a great use for those scraps of acid paper you have left from scrapbooking or altered art.

* What is a side load ?

For those that do not know...a side load is loading one side of your brush with one color and the other side with another color, then blend as applying . Used to add shading or to accent and area.
