## Mini bag Angel with note pad

Cut out pieces with wrong sides together

Head with body...Sew around piece leaving bottom open...Turn and stuff firmly and hot glue or sew bottom shut.

Arms....Sew around both arms leaving open at end. Turn and stuff firmly... Glue or sew ends shut.

Attach arms behind body just below the neck by hot

gluing or hand stitch on.

Dress....Sew shoulder seams and then turn bottom of sleeves up 3/4 " and press... Turn both short ends under 3/4" and press down...I then lay the 1/8" elastic just above the raw edge and back stitch across the end of elastic... Then zig zag over the elastic to the end...At the end pull elastic a little bit (not too much) and then back stitch across the end so you catch the elastic...(when you zig zag you

are making a casing round the elastic)..Or skip this step if you want to hand gather the bottom of her sleeve...

Patches...This is where you would want to put the patches on the front of her dress...Bottom patch should be about 2" to 3" inches from the bottom ...They can go anywhere across the front but keep in mind where the note pad will go...Hand stitch on and add button.

Sew one side seam and then press under the bottom of her dress a tiny bit and then turn under again  $\frac{1}{2}$ " and press down, making a casing...Sew down along pressed edge, back stitching at beginning and end...With a small safety pin hooked to one end of your elastic, thread elastic through the casing...Sew across one end to secure elastic and adjust the amount of stretch you want...(This should measure about 5" gathered and to stretch to about 8")...Sew across end to secure...Sew other side seam...Hand gather around the neck after turning it under  $\frac{1}{2}$ " and leave tails to tie...

(This is where you would hand gather the bottom of the sleeves also, if you didn't do elastic)...Put dress over dolls head and pull strings tight around her neck and tie off...Put small amount of stuffing in sleeves.

Hair...Wrap the small jute around fingers about 15

times and tie and knot around the middle of the clump...Clip through opposite ends and glue the knot to the middle top of her head at seam line...Before gluing scrunch in hand to make it go wild!

Face....Make a tiny round ball out of Sculpty and flatten it just a bit (Check out pattern piece of head to see about the size I used) Bake according to the directions and cool..( this is where I would bake a lot of different sizes, so you can play with what you like best)Position and glue on face with E6000 glue...Press down once in awhile until glue is set...Apply some blush to her cheeks and hands

...With the tiny end of your round tooth pick apply eyes just above nose...(Careful, you may want to practice first to see what size you want them)...With the pen, draw eyelashes, eyebrows and freckles when dry...Use a light touch!...With white, put teeny, tiny specks of white in her upper corners of her eyes and on her checks..Add mouth with the red!...As I said before...Practice this first before applying on face.

Wings and hanger...Take a piece of jute (about 5" long and make a loop by tying two ends together as one piece with a knot...Take the wired ribbon and tie a nice big bow and glue the loop to the knot on

the bow and then glue all to the back of her head, so the loop is between the head and the bow.

Note Pad...Take a piece of jute and tie one end around the wrist of one arm and then take and tie

the other end to the other arm...I put the pad on the jute before tying other side to see where it will hang and how long to make it...

Cardboard of pad goes over the jute with pad hanging in front...Glue or sew on buttons...Hope you enjoy making this doll!
